## What We Do

Our core business is managing and providing engineering, test, program support, and strategic management support services.

Our corporate **Values** drive how we do what we do. We value integrity and ethics, excellence, the unique character and ability of our people, safe practices, and customer and community service.

Our **Mission** is what we do. From Defense to Civil ground, air, sea, and space programs, our people advance customer mission success by forging superior solutions for systems acquisition, engineering, operations, and sustainment.
